

Machine Programmer

Job Description:

Responsibilities include but are not limited to:

- Program laser, punch and brake press equipment
- Create CNC programs and nesting layouts for the water jet
- Limited updating of CAD drawings, sheet metal flats and DXF files for CNC programs
- Work closely with machine operators with schedule and programs
- Suggest improvements in design changes to the parts for improved manufacturing and processes
- Perform data entry to close job orders for parts and/or assembly
- Meet assignment deadlines consistently
- Work independently, with little to no supervision
- Complete other duties as assigned by management

Qualifications/Essential Functions:

- Ability to lift up to 50 lbs., bend, sit, and stand repeatedly in a shop environment
- Computer knowledge, including proficiency in Microsoft Excel, and experience in nesting software
- Strong organizational skills, and ability to prioritize work flows
- Attention to detail and accuracy
- Experience in the sheet metal fabrication industry is preferred
