

SPRAY NOZZLE REPLACEMENT INSTRUCTIONS

FOR SUBWAY MODELS SUB-123P & NVT-3/9

Subway proofers equipped with the Automist option should have the water injection nozzle inspected and replaced at regular intervals, as determined by usage and water hardness. Call NU-VU service at 800.338.9886, option 1 for replacement parts.

Nozzle (2 pieces)

1. For easy access, remove the pan racks on either side of the proofer (Fig. A).
2. Lift the element cover straight up, then slide it to the left (Fig. B)
3. Pull the right side of the element cover toward you and remove it from the cavity (Fig. C) to expose the blower wheel and nozzle at the back of the cabinet (Fig. D)

4. Remove the nozzle from the fitting by turning it 1/4 turn counter-clockwise (Fig. E & F)
5. Install the new nozzle by inserting into the fitting and turning 1/4 turn clockwise (Fig. E & F)
6. Replace the element cover.
